

4-pin Lemo power connector

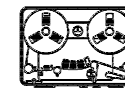

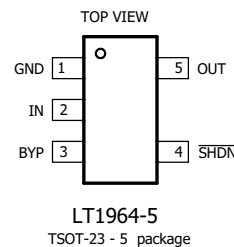

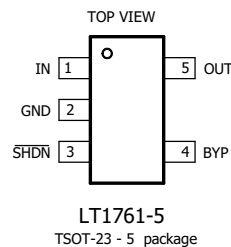

note: sockets viewed from front, connector viewed from solder side

LEDs: Geel, low current 2mA
(E00: LED-5-diff-geel-HQ)

Iuit nominaal = ±15...30mA
Iuit maximaal = ±100mA

Iuit kortsluit +5V = 200mA piek, daarna 160mA continue
Iuit kortsluit -5V = 230mA piek, daarna 150mA continue

- Koeling regulators via print oppervlak
- Beveiligingen: reverse battery, current limit, reverse voltage, thermal limit. (under voltage via UV monitor)
- als 1 accu ontbreekt, te laag is, of omgepooled zit, komen beide regulators niet op. (functionaliteit via UV monitor)
